

My tester function produces this result

```
rmm@rmm-VirtualBox:~/CS-6420-Assignments/Assignment6$ ./RMM_Euler_V1
-----
test1.txt:
There exists an Euler cycle in this graph:
0 -> 8 -> 9 -> 1 -> 7 -> 8 -> 2 -> 5 -> 6 -> 5 -> 4 -> 7 -> 6 -> 4 -> 3 -> 7 -> 0 -> 1 -> 2 -> 3 -> 9 -> 0
-----
test2.txt:
There exists an Euler cycle in this graph:
0 -> 2 -> 1 -> 0 -> 3 -> 4 -> 0
-----
figureDG.txt:
There does not exist an Euler cycle in this graph
-----
test4.txt:
There exists an Euler cycle in this graph:
0 -> 4 -> 3 -> 4 -> 2 -> 4 -> 1 -> 4 -> 0 -> 3 -> 2 -> 3 -> 1 -> 3 -> 0 -> 2 -> 1 -> 2 -> 0 -> 1 -> 0
-----
test5.txt:
There does not exist an Euler cycle in this graph
-----
test6.txt:
There exists an Euler cycle in this graph:
0 -> 1 -> 2 -> 0
-----
test7.txt:
There exists an Euler cycle in this graph:
0 -> 1 -> 1 -> 2 -> 2 -> 0 -> 0
-----
```

For your convenience, here is a picture of each graph along with the Euler cycle produced by the algorithm:

test1.txt

test1.txt:

There exists an Euler cycle in this graph:

0 -> 8 -> 9 -> 1 -> 7 -> 8 -> 2 -> 5 -> 6 -> 5 -> 4 -> 7 -> 6 -> 4 -> 3 -> 7 -> 0 -> 1 -> 2 -> 3 -> 9 -> 0

test2.txt

test2.txt:

There exists an Euler cycle in this graph:

0 -> 2 -> 1 -> 0 -> 3 -> 4 -> 0

figureDG.txt

figureDG.txt:

There does not exist an Euler cycle in this graph

test4.txt

test4.txt:

There exists an Euler cycle in this graph:

0 -> 4 -> 3 -> 4 -> 2 -> 4 -> 1 -> 4 -> 0 -> 3 -> 2 -> 3 -> 1 -> 3 -> 0 -> 2 -> 1 -> 2 -> 0 -> 1 -> 0

test5.txt

1 • • 0

2 • • 3

test5.txt:

There does not exist an Euler cycle in this graph

---

test6.txt

test6.txt:

There exists an Euler cycle in this graph:

0 -> 1 -> 2 -> 0

test7.txt

test7.txt:

There exists an Euler cycle in this graph:

0 -> 1 -> 1 -> 2 -> 2 -> 0 -> 0
